21) What I find good about the course is ...

how Mr. Malang is really motivated and engaged in the topics, that really raises my interest level!

The lecture, the athmosphere (the air quality not so much, but hat is not your fault), one of the most arkstaining seminars at the de-

of that it is close to research Post- Maling is pursuing, so he is very knowledgebbe about the tip? -> time taken to help to with research paper & scientific process in schen

when the coase is ret, I like appracen classer. Time - we take our fine to discuss every possible outline 22) What I do not find so good about the course is ... the SPD bashing 11 please focus on the AFD The beamer, the lich of air conditioning - He projector - grading is not "balanced", too heavy auguars an discussion, are hard to follow - some hires the student de presentations with rather mediocre proposed discussion questions & activities I would rather hear more input from Dr Malaug 23) I would like to make the following suggestions for improving the course: bying cooleres Improve time management a little, other wise everything is great

the 3 or 4 serious on classic functions could probably be conduced into 1-2 , as many of this should know this already a can simply read a text about it

- mare qualitative research examples

Give that man a pay rise
