

The Working Lives of 1050 Youth in Urban Benin

Bart Kudrzycki

Outline

- Context
- The Youth Survey
- Determinants of education and work
- Longitudinal results

Why youth employment?

- Youth population boom
 - One-fifth of 15-24 year olds are inactive (ILO 2020)
- Period of transition and vulnerability
 - Vulnerability appears to increase with globalization and competition
- Long periods of unemployment have a lasting impact on youth:
 - Individual level: self-esteem, respect, sense of achievement
 - Societal: integration, cohesiveness, citizenship
- Slow rate of formalization (Lall et al. 2017, Fox et al. 2020)

Literature

ILO

SWTS

- Longer transitions for women & importance of social networks (Matsumoto & Elder 2010)
- Impact of education on job search positive up to a point (ibid., Manacorda et al. 2017)
 - May be due to higher expectations, reservation wages, or queuing (Nilsson 2019)

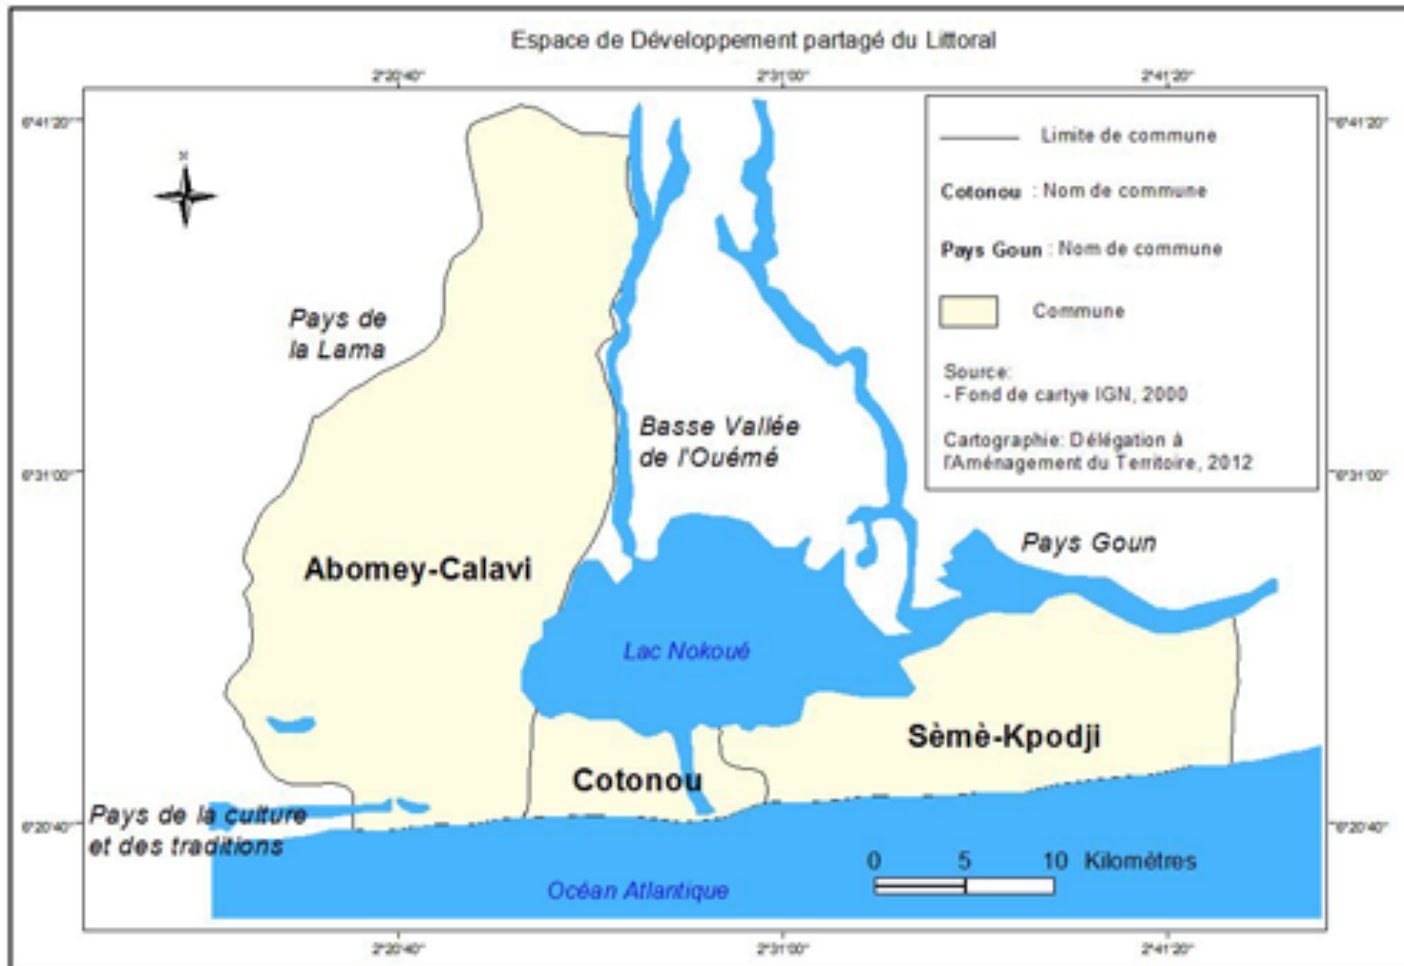

Research Questions

- Q1 What are the determinants and effects of education choices on youth employment outcomes?
- Q2 How does the school-to-work transition differ for young men and women?

Context: Youth aged 20-29 in urban Benin

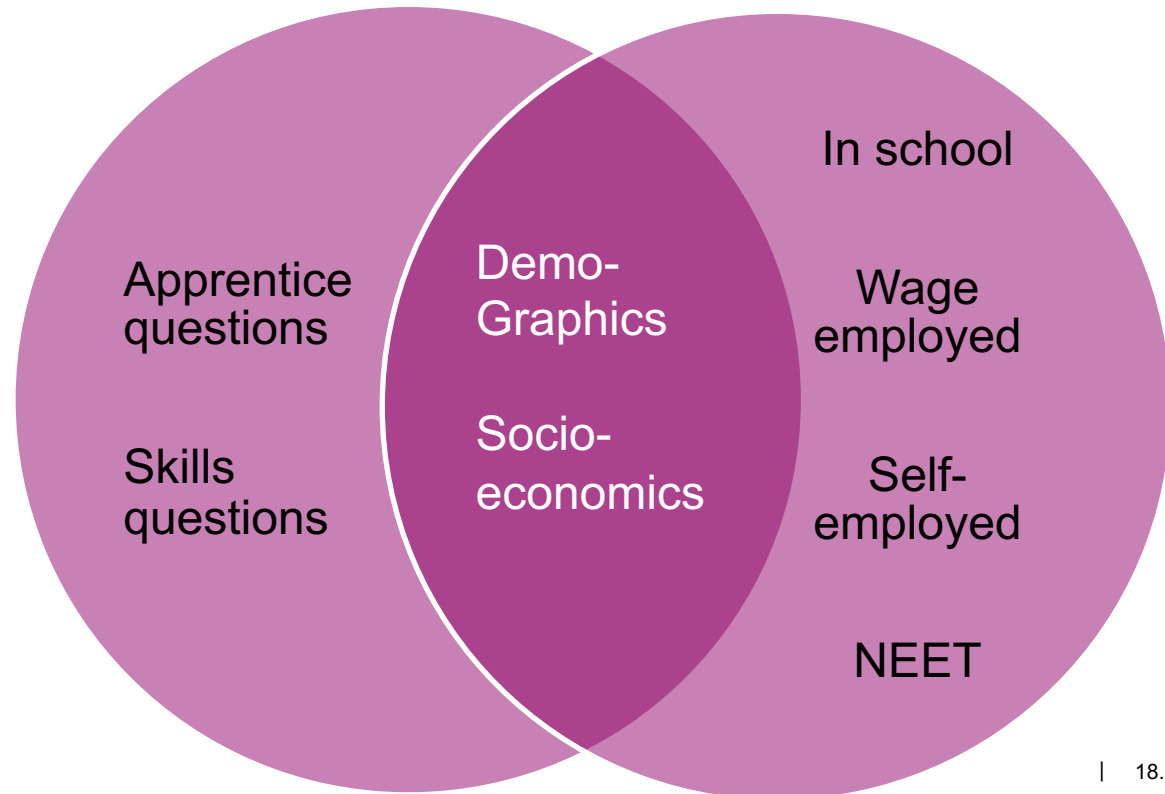

Approach: Summary statistics (subgroup means & regression analysis)

Geographic coverage

Data

- Combination of two surveys
 - 268 apprentices from applicant pool to apprenticeship program
 - 777 randomly sampled non-apprentices

Sample size

N = 1,045

	Youth Survey		census %	% male
Apprentice	268	(25.65)	7.79%	88.06%
Employed	173	(16.56)	11.76%	55.49%
In School	184	(17.61)	31.07%	55.98%
NEET	267	(25.55)	17.25	31.84%
Self-Employed	153	(14.64)	32.13%	45.10%

Apprentices stay in the family business

- Apprenticeship is “inherited” from father’s side
- 12 out of 13 employees are apprentices
 - 53% of training firms only hire apprentices

Employed youth are firmly in informal sector

- 54% have no contract
 - half of contracts verbal
- 95% make <110,000 FCFA (180 CHF) per month
- Responses at baseline indicate high turnover
 - <50% working for current employer for more than 1 year
 - 73% would like more hours, 65% looking for new job
- Low labor demand, even within firm

NEET youth are optimistic about their prospects

- Over two thirds report never having been employed
 - Nearly half had been out of work for 6+ months

Table 12: Where do you see yourself in five years?

	NEET	Self-Employed	Wage Employed	Total
Still looking for work	8 (2.92)			8 (1.29)
Same employer			20 (10.99)	20 (3.22)
Different/new employer	58 21.17	43 (26.06)	47 (25.82)	148 (23.83)
(Still) self-employed	191 69.71	103 (62.42)	91 (50.00)	385 (62.00)
In education/training	11 (4.01)	3 (1.82)	16 (8.79)	30 (4.83)
Other	6 (2.19)	16 (9.70)	8 (4.40)	30 (4.83)
Total	274 (100.00)	165 (100.00)	182 (100.00)	621 (100.00)

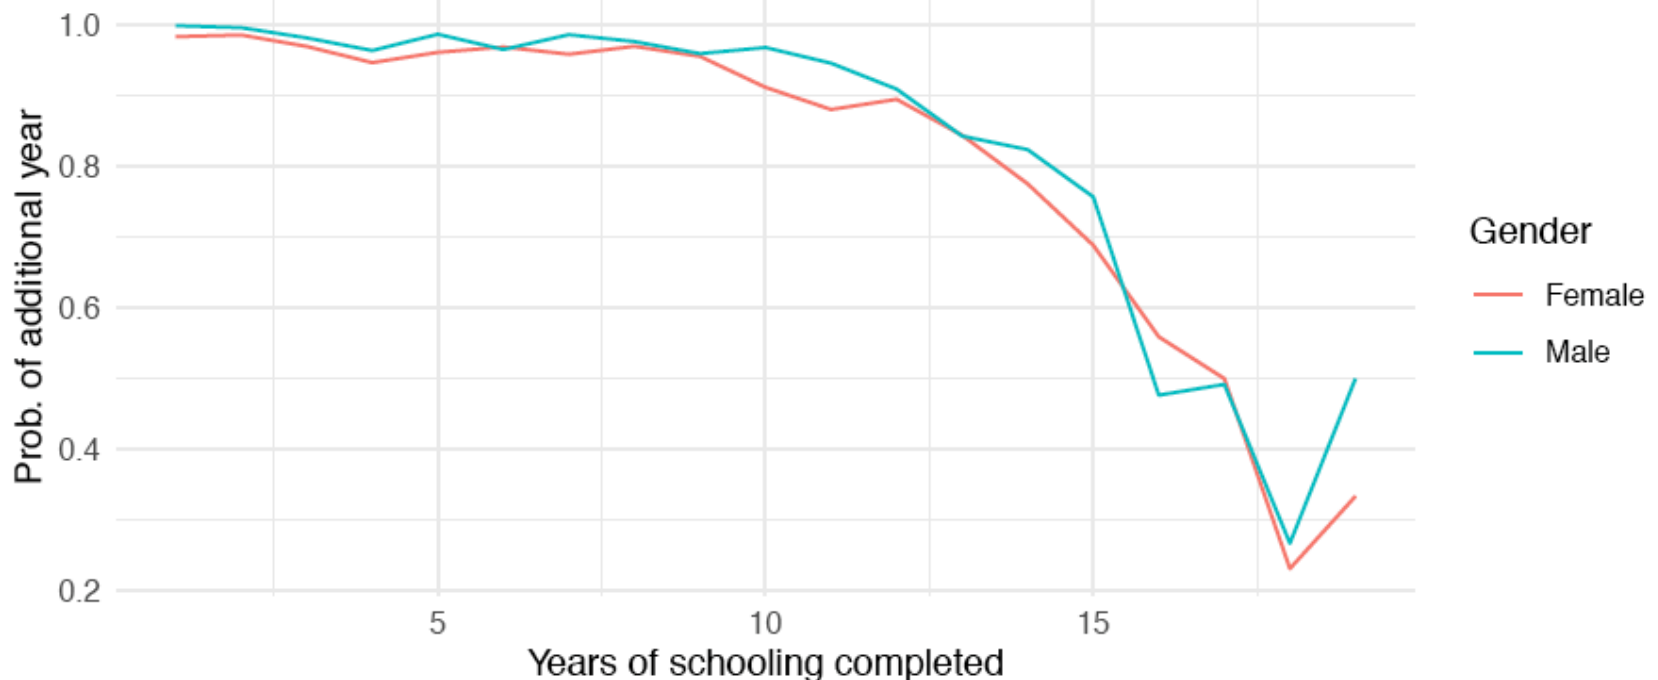

Students aspire to more of the same

- Nearly a third of all 20-29 year-olds still in education
- Mainly aspire to more education
 - 19% plan to start own business, compared to 76% of apprentices

Gender and education

- Urban Benin yet to arrive at gender parity in schooling

Figure 2: Probability of additional year of schooling

Regression analysis

Table 5: Educational Attainment Regressions

	<i>Dependent variable:</i>		
	Years of Schooling	At Least Secondary	BAC Holder
	<i>OLS</i>	<i>logistic</i>	<i>logistic</i>
Male	1.810*** (0.279)	1.285* (0.137)	1.358** (0.151)
Num. Siblings	-0.064 (0.055)	0.989 (0.027)	0.959 (0.030)
Father Secondary Grad.	2.551*** (0.384)	3.160*** (0.190)	3.658*** (0.188)

Note:

*p<0.1; **p<0.05; ***p<0.01

Regressions for females on left-hand side. Odds ratios reported for logistic regressions.

Results 1: Education

- Education rates are high and increasing
 - 31% of 20-29-year-olds still in school!
- Education choices influenced by parents
 - Gender gap of about 1-2 years of attainment
- Additional schooling decreases probability of self-employment

Results 2: After education

- Widespread informality
 - 75% of self-employed have no workers
 - 12 out of 13 workers employed in training firms are apprentices
 - Preliminary analysis of follow-up surveys suggests unstable activities
- Labor demand shortage
 - High education retention
 - Low formal employee numbers
- Importance of social networks (Matsumoto Elder 2010)

Up next

- Currently running third follow-up survey
 - Will allow for time-series analysis
- Impact of COVID-19 on youth employment, schooling, firms
- Choose direction for further analysis

Table 1: Activity transitions II: follow-up wave 1 to wave 2

Follow-up 1	Follow-up 2					Total
	School	NEET	Self-Employed	Wage Employed	Apprentice	
School	72 (66.67) [79.12]	16 (14.81) [9.20]	5 (4.63) [3.76]	14 (12.96) [7.82]	1 (0.93) [0.69]	108 (100.00) [14.96]
NEET	8 (4.00) [8.79]	104 (52.00) [59.77]	33 (16.50) [24.81]	37 (18.50) [20.67]	18 (9.00) [12.41]	200 (100.00) [27.70]
Self-Employed	7 (5.93) [7.69]	21 (17.80) [12.07]	64 (54.24) [48.12]	17 (14.41) [9.50]	9 (7.63) [6.21]	118 (100.00) [16.34]
Wage Employed	2 (1.43) [2.20]	21 (15.00) [12.07]	16 (11.43) [12.03]	94 (67.14) [52.51]	7 (5.00) [4.83]	140 (100.00) [19.39]
Apprentice	2 (1.28) [2.20]	12 (7.69) [6.90]	15 (9.62) [11.28]	17 (10.90) [9.50]	110 (70.51) [75.86]	156 (100.00) [21.61]
Total	91 (12.60) [100.00]	174 (24.10) [100.00]	133 (18.42) [100.00]	179 (24.79) [100.00]	145 (20.08) [100.00]	722 (100.00) [100.00]
