Overview

The legislature’s function in democratic systems is to represent as much as it is to regulate, meaning that legislators are most directly tied to territorially defined policies. It could be said that remaining “national” is their job. In recent years however, maybe as an effect of increased international interdependence, legislators start finding their voice on the international stage, injecting new and different elements into politics and policies formerly controlled almost exclusively by the executive branch.

The first part of the seminar focuses on the factual change in the relationship between national parliaments and international politics and asks for reasons of this change. How does globalization affect national legislators? How can legislators influence international politics? What effects have the two-level games for international negotiations?

The second part analyses patterns and changes in the classic parliamentary function of controlling international action of the executive. The new rights of European parliaments established in the Treaty of Lisbon thereby receive special attention. A set of explanatory factors for variance in the strength of the oversight and scrutiny function and action will be developed and tested.

The concrete strategies of parliaments to act international are investigated in the following part. On the one hand, the institutionalization of international parliamentary cooperation will be elaborated in case studies like the Inter-Parliamentary Union. On the other hand, the seminar tries to map patterns of direct contact and exchange of national parliaments, both on the level of committees and parties. How do national parliaments coordinate and cooperate? What do they exchange and how can we map these exchanges?
Course Goals:

On successful completion of this seminar students will be able to:

- understand the changes and effects of global interdependence on national politics and especially the role of national parliaments
- identify basic and advanced dimensions of parliamentary inclusion in international contexts
- describe and analyze parliamentary coordination in institutional settings and between chambers
- evaluate the democratic implications of parliamentary interdependence
- use the concepts and databases for tracking, comparing and analyzing parliamentary behavior and influence in international politics.

COURSE REQUIREMENTS AND GRADES:

Student Responsibilities:
The seminar will meet Thursday from 15.15 to 16.45 in D430. The seminar format means that each individual student is responsible for completing the required readings prior to the class meetings, and for contributing to the discussion of the material. Absence from single sessions has to be communicated via mail in advance. Punctuality is crucial and tardiness will not be tolerated, unless specific and justified reasons are presented to the instructor (such as slightly overlapping class, mobility issues).

You have to register in Ilias to get to the course material and in StudIS to get your grade!

Grades:
The grade consists of three parts, the presentations (20%), the development paper and its presentation (pass/fail), and the research paper (80%). Students can only be graded if they are registered for the course in StudIS. The examination requirements of the department require the weighted mean of all parts to be at least pass (4.0). Additionally, all parts have to be provided. Individual parts cannot be repeated separately.

(Wortlaut FB: „Eine Prüfungsleistung ist bestanden, wenn der gewichtete Durchschnitt aller Teilleistungen mindestens ausreichend ist und alle Teilleistungen erbracht wurden. Einzelne Teilleistungen können nicht gesondert wiederholt werden, sondern nur im Rahmen der Wiederholung der gesamten Prüfungsleistung“)

Presentation:
Every student has to present the topic of one session. In these presentations, we are not looking for complete summaries of the readings, but for thoughtful engagement with the problem under discussion. Try to sketch the development and state of the art of the theoretical and empirical aspect of the phenomenon as brief as possible. Your task is to set the ground for a thoughtful discussion of the reading in class. In the end, please include 1 – 2 analytical discussion questions.

The presentation should be maximum 10 minutes (without discussions)

Presentations will be graded on basis of the following criteria:

- Literature incorporated (relevance and precision): 30%
- Theoretical stringency: 30%
- Timing: 10%
- Slides 10 %
- Discussion lead: 20%

Term Paper:
The paper consists of two separate items of work:

First, a short development paper (1 – 2 pages), that takes our readings and discussions as a point of departure and develops a research agenda and/or a preliminary empirical investigation on a
A topic of your interest. This assignment is the first step towards your final paper and is due by July 15th, 2018. Topics can thus vary according to individual preferences, but should remain in connection with the class theme, and be chosen in accordance with the instructor. This research idea will also be presented by the student in the last block of the seminar (development paper and its presentation graded pass/fail).

The final paper (~5000 words) that should include a theoretical argument and an empirical observation related to it has to be handed in no later than 15.09.2018. The final paper is individual, original, fair, and should demonstrate aptitude to both synthetic and critical reasoning. “Original” means that the paper does not exist prior to its writing by the student and reflects the ideas of its author. This requirement excludes plagiarism, and authorized reproduction of already existing papers. “Fair” means that if you borrow from other people’s work (to a limited extent), you should quote it and acknowledge it appropriately (by the use of quotation marks and in a bibliography). “Critical reasoning” means that you are able to use different sources and put them in perspective in order not to simply repeat what other people say, but are able of highlighting or questioning underlying problems, context and crucial conditions, etc.

Term Papers will be graded on the basis of the following criteria:

- Research question (relevance and precision): 10%
- Structure (logical consistency): 10%
- State of the art: 10%
- Argument and analysis: 60%
- Scientific standard: 10%

Deadline 15.09.2018
Course Plan

I The Present State of Political Globalization

19.04.18 Introduction

26.04.18 Session 1: A New World Order

03.05.18 Session 2: Executive – Legislative Relations

Möllers, C. (2013). The Three Branches: A Comparative Model of Separation of Powers. Oxford University Press., Ch. 2.III The Thee Powers: A Model from Legitimacy (pp.80-109) and Ch. 4 Separation of Powers beyond the State (pp.150-167)

10.05.18 Session 3: Bank Holiday: Reading: Research I: Finding a research question and the role of causality

II Classic Functions

17.05.18 Session 4: Parliamentary Oversight/ Control

24.05.18 Session 5: Ratification

31.05.18: Session 6: Bank Holiday: Reading: Research 2: Getting Data and Analyzing It

07.06.18: Session 7: Budget

Blockday 1: Date TBA

III Parliamentary Action

Session 8: International Parliamentary Action I: Multilateral Institutions

Session 9: International Parliamentary Action II: Bilateral Dimension

pattern of parliamentary diplomacy

Session 10: International Parliamentary Action III: Party Exchange

Blockday 2
